Dear MECC Student,

On behalf of the administration, faculty, and staff, I welcome you to Mountain Empire Community College. We appreciate the talent and diversity you bring to us, and we hope your time here will be intellectually stimulating and personally rewarding.

This transfer guide is designed to help you plan your transfer to a four-year college or university, but you should be aware that this information is limited to essential information and is not intended to cover all the detailed aspects of the transfer process. Whenever possible, you should consult personally with an MECC faculty advisor or counselor and appropriate individuals at the transfer institution of your choice.

It is very important to keep in mind that schools within colleges and universities set their own course transfer standards and these standards are constantly changing. Your selected major will often determine whether courses will transfer for elective or degree credit. Always work closely with your advisor. Some courses, e.g., Math, may be accepted for credit in a B. A. program but not in a B. S. program. Students who have earned an Associate in Arts & Sciences (AA&S) degree from MECC will have met the lower divisional general education requirements for many colleges in Virginia and around the region. Please check with your advisor, the division chair, or a counselor for information about our guaranteed admissions agreements or articulation agreements with senior institutions.

For those students who do not complete an associate degree but want to transfer to one of the senior institutions, such as the University of Virginia's College at Wise or East Tennessee State University, we have provided links to the course-by-course equivalency guides on each college's website. If no guide is available on their website, you should contact the college's transfer coordinator directly. Contact information is provided at the end of this guide.

Please note there is no equivalency information for physical activity courses. MECC's physical activity courses are accepted as part of the core curriculum at the institutions in this guide. Classes that have no equivalents at the senior institution may be accepted as electives.

As you make plans to continue your college education, please let our experienced faculty advisors and counselors assist you in the transfer process. They are knowledgeable and willing to help you gather the most accurate and up-to-date information available.

Very best wishes,

Lisa Butcher
Director of Student Services

Virginia's system of public colleges and universities has extended higher education throughout the Commonwealth from Eastern Shore to Big Stone Gap and from Fairfax to Southside. The system gives students ready access to college and enables them to choose from among many two- and four-year institutions. The Commonwealth has created a remarkable system intended to provide an educated, responsible citizenry and well-trained professionals. For Virginia to achieve these goals fully, especially in a time of financial stringency, the system must function as efficiently and effectively as possible. A report issued by the Institute for Higher Education illustrates the importance of strong transfer policy in the efficiency of higher education in the context of state government. The report, *State Policy and Community College-Baccalaureate Transfer*, links strong transfer policy with reducing state appropriations per degree. Moreover, the report notes that strong transfer policy reduces "achievement disparities that prevent low-income and minority students from obtaining the baccalaureate degree."

Some students begin college at a community college and subsequently transfer to a senior college or university to achieve their educational aspirations. These students must be assured of fair access to a four-year education and reasonable credit toward a bachelor's degree for their community college courses and program. Transfer should be easy and orderly. According to the Commission on the University of the 21st Century, "It should be made as easy as possible for graduates of community colleges to transfer to senior institutions and get full credit for the work they have done."

Transfer is also a matter of national interest. The American Council on Education has issued a major policy statement - *Setting the National Agenda: Academic Achievement and Transfer*. The ACE believes that qualified community-college students should be able to "transfer easily and routinely" to senior colleges and universities. "America's community colleges in particular embody our hopes for the future. For millions of students, they are the entry point to higher education and thus serve as the avenue to intellectual and economic growth. Entry to senior colleges or universities by community college students, i.e., transfer, is central to the realization of equal opportunity in education."

The State Policy on Transfer aims to enhance cooperation and consistency among institutions of higher education in Virginia with the intended goal of improving transfer for Virginia's students. This goal of smooth and orderly transfer has not been fully achieved, even though a number of community colleges and senior institutions have worked together diligently. Therefore, the State Policy on Transfer seeks to improve collaboration among Virginia's institutions of higher education while promoting efficiency in the transfer process.

Ideally, students should be able to move through Virginia's public education system as if it were a continuum, rather than a system of distinct levels and separate stages. The State Policy on Transfer has been guided by numerous assumptions:

- All capable students in the Commonwealth should have access to all levels of higher education.

- The institutional autonomy and diversity of Virginia colleges and universities are valuable and must be assured.
- Every senior institution should take significant responsibility for enrolling community college students.
- Effective transfer is a joint responsibility of community colleges and senior institutions.
- Transfer students and native students should be assured of equitable treatment by each senior college and university.
- Students should be encouraged to advance as far through the educational system as they are able.
- Students should not have to repeat coursework they have completed satisfactorily at a community college.
- The Commonwealth should have a coherent statewide policy on transfer that encourages continuing cooperation and can be sustained over time.
